(54) System and method for providing voice-activated presence information

(57) Systems and method for providing voice-activated presence information are disclosed. According to one embodiment, the system includes a voice gateway (12) in communication with a presence server (24). The presence server is for determining presence information of an individual. The voice gateway is for voicing the

presence information to a caller after receiving the presence information from the presence server. The voice gateway may also place an outgoing communication to the individual. The presence server may determine whether the individual is present and available on a communication network.
